This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A compound comprising a baculovirus expressed recombinant Fel dI, wherein the baculovirus expressed recombinant Fel dI comprises:

chain 1, encoded by a nucleic acid sequence that is ~~amplifiable~~ amplified by PCR using Fel dI chain 1 complementary primers of SEQ ID NO:1 and SEQ ID NO:2, wherein the template for PCR ~~comprises~~ consists of pET11dΔHR chain-1 *Fel*dI; and

chain 2, encoded by a nucleic acid sequence that is ~~amplifiable~~ amplified by PCR using Fel dI chain 2 complementary primers of SEQ ID NO:3 and SEQ ID NO:4, wherein the template for PCR ~~comprises~~ consists of pET11dΔHR chain-2 *Fel*dI,

expressed in series and linked together by a glycine/serine linker encoded by SEQ ID NO:5, wherein said recombinant Fel dI binds human IgE and IgG at a level comparable to that of natural Fel dI.

Claim 3 (previously presented): The compound of claim 1 further comprising a sFv of monoclonal antibody H22 which is a humanized anti-CD64 antibody.
